SUMMARY

A passionate learner exploring software development, including web and Android app development, using AI tools as needed to support the process. Enjoys working on open-source projects and solving tricky bugs with patience and focus. A fast learner with good problem-solving and communication skills, eager to grow into a skilled developer through hands-on practice. Always curious to explore new technologies and turn ideas into real, working solutions.

PROJECT EXPERIENCE

Self-Initiated Project, Github

Nov 2025 – Present

- Developed and maintained multiple personal projects on GitHub, focused on applying and adapting to new concepts daily.
- I am highly motivated to continuously expand my core programming skills through practical, hands-on open-source contributions.

Collaborative Developer in Open-Source Ecosystem

Nov 2023 – Present

- Possess high concentration and patience to dive deep into tricky bugs or errors until they are completely resolved.
- Suggested innovative features and enhancements to help make projects better.

Self-Initiated Project, Github

- Built diverse software solutions, including Android applications, using Google’s AI-powered development tools.
